Mastered intermediate and advanced topics in full-stack development (including Rails, Git, and DS&A challenges) while building multiple full-stack projects both independently and via pair-programming.

[herSTYLE](#) — This project was developed with Ruby on Rails, which is based on lifestyle articles. I have followed the given design and decided to develop this article app on women lifestyle. I am planning to work on it in future to add more features and I'll add a personal logo as well for this web app. For testing I have used RSpec and Capybara.

- Built with: (Ruby, Ruby on Rails, HTML, Scss, RSpec, Capybara)

[Global Summit](#) — This project was the capstone project for the HTML & CSS module. I was provided with the design that needed to be mocked up with some changes and our own creativity.

- Built with: (HTML, CSS, Bootstrap)

[CSS Linter](#) — This project was the capstone project for the Ruby module. I have created this linter with 4 linting rules.

- Built with: (Ruby, RSpec, CSS)
